

Discussion 3

Implications of AI for Society

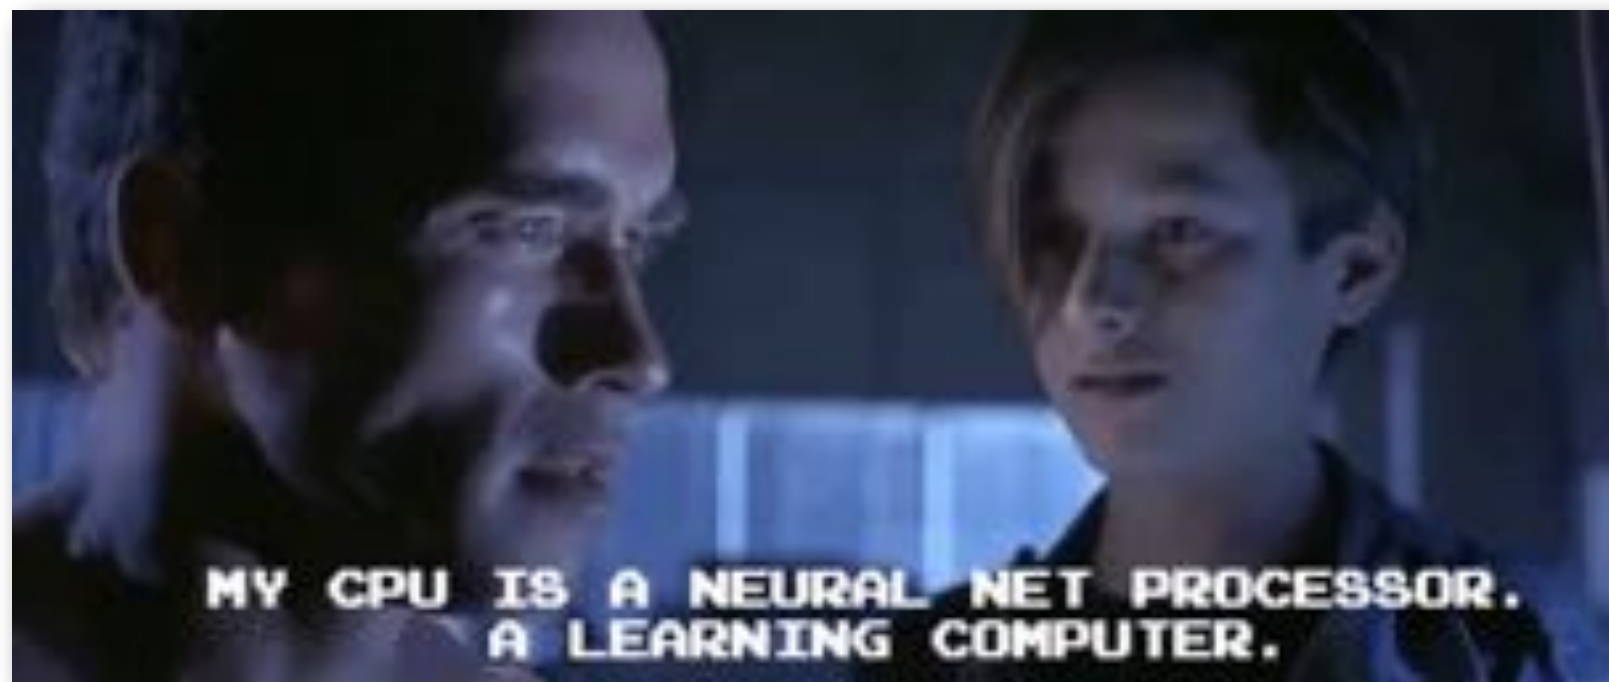

Discussion 3

Implications of AI for Society

This is **not** a commentary on Artificial Generalized Intelligence (AGI).

***“Humans and robots, living together,
mass hysteria!!”***

“justice”

economics

work

privacy

politics

```
private $host;  
private $username;  
private $password;  
private $database;  
private $charset;  
  
static private $link = null;  
  
public function Connect()  
{  
    self::$link = mysql_connect(self::$host, self::$username, self::$password);  
    if (!$link) throw new MySQLException("Cannot connect to database");  
    mysql_select_db(self::$database, $link);  
    mysql_set_charset(self::$charset, $link);  
}
```

Power

- * Bridging gaps between domains of knowledge, areas of experience, scales of time.
- * e.g., united models of medical data.
- * e.g., automated image captioning.

Describes without errors

A person riding a motorcycle on a dirt road.

Describes with minor errors

Two dogs play in the grass.

Somewhat related to the image

A skateboarder does a trick on a ramp.

Peril

- * e.g., audio and video learned together

Algorithms affect us all

We are the data.

Chinese Facial Recognition System Would Fine Jaywalkers By Text

As opposed to simply displaying information on giant LED screens as happens now.

Automation affects how (much) humans work

- Some of the jobs that *will* be affected by AI
 - Trucks and Taxis: **5M (10M)**
 - Retail: **5M**
 - Factory: **12M**
 - *Radiology*: **34K**
 - Surgery: **700K**
 - Physicists: **20K**

Machine Bias

Baroness Portman, left, was rated high risk. Dylan Pagett was rated low risk. (Data: Election for ProPublica)

Machine Bias

Who's thinking about these challenges?

Science has long been complicit in this machinery

“For example, **Huygens and Cassini facilitated and directed astronomical observation missions** in order to help the French better determine the location of St. Domingue, the island that houses the modern nations of Haiti and the Dominican Republic. Why? Because this would **help make the delivery of slaves and export of the products of their labor more efficient.**”

- CP Weinstein

Opportunity

- ✱ Eras of disruption are inflection points for **balances of power.**
- ✱ **Access to knowledge** and technology arbitrates the accumulations or the shifts of power.

How do we care for the planet?

- ✱ Can teaching machines to learn help us discover ways for ourselves to learn better?

How do we **game**?

- * Can we learn from machines how to play games better? And by extension, how we interact with each other?

How do we **learn**?

- * Can teaching machines to learn help us discover ways for ourselves to learn better?

How do we **work?**

- * How do we use this opportunity to change the culture of our work, who has access to work and training,

Watching for trends

Wooo let's go!
